### SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

#### 8.1 Control parameters

Component	CAS No.	Exposure Limit	Basis
Glycerin (mist)	56-81-5	5 mg/m <sup>3</sup>	OSHA Table Z1 (Respirable Fraction)
		15 mg/m <sup>3</sup>	OSHA Table Z1 (Total Dust)

#### 8.2 Exposure controls - personal protective equipment

Eye protection:	Tightly fitting safety goggles. In addition to goggles, wear a face shield if there is a reasonable chance for splash to the face.
Respiratory protection:	Ensure adequate and ongoing ventilation is maintained in order to prevent buildup of excessive vapor and to ensure occupational exposure limits are adhered to. If appropriate, and depending on your patterns and volumes of use, the following engineering controls may be required as additional protective measures: a) Isolate mixing rooms and other areas where this material is used or openly handled. Maintain these areas under negative air pressure relative to the rest of the plant. b) Employ the use of Personal protective equipment - an approved, properly fitted respirator with organic vapor cartridges or canisters and particulate filters. c) Use local exhaust ventilation around open tanks and other open sources of potential exposures in order to avoid excessive inhalation, including places where this material is openly weighed or measured. In addition, use general dilution ventilation of the work area to eliminate or reduce possible worker exposures. d) Use closed systems for transferring and processing this material.
Skin protection:	Impervious clothing. Wear face-shield and protective suit for abnormal processing problems.
Hand protection:	Chemical protective gloves (nitrile rubber, NBR)
